

### Approx. Cost for New Industrial Wastewater Permit

Total Approx. Cost:      **\$ 8158.00**      **\*(Dependent of Flow)\***

Breakdown:

1. Minimum amount of flow one can buy: **200 gal/day Monthly Average**

**1 gal = \$ 18.77**

(What makes up that \$18.77?)

- |   |   |         |
|---|---|---------|
| <ol style="list-style-type: none"><li>1. Plant Expansion Fee</li><li>2. Inflow/Infiltration Fee</li><li>3. Water Conservation Fee</li></ol> | } | \$18.77 |
|---|---|---------|

200 gal (Min Flow) x \$18.77gal = **\$3758.00**

2. New Industrial Wastewater Permit ( Last 3 Years) = **\$2000.00**
3. Annual Sampling /Testing/Reporting
  1. 1(minimum) IU Test/Sample/Report (Testing done by you the industry, by a recognized analytical lab ( i.e. Contest Analytical, R.I Analytical, New England Bioassay, ect.)  
1 IU = **\$1200.00**
  2. 1 (minimum) POTW Sample/Test/Report (Sampling done by us the town, and sent to a recognized analytical lab)  
1 POTW = **\$1200.00**

Total Approx. Cost:      **\$ 8158.00**

**NOTE: Initial start up fees differ mostly with the about of flow bought at initial startup. This example was done with the minimum amount of flow that can be bought, 200 gallon a day. For example if your initial startup flow was 1000 gallons a day, you total cost for step 1 would be \$18770.00. The Cost of steps 2 and 3 stays the same, so your total cost for a new industrial permit would be \$23170.00 (18770 + 2000 + 2400 = \$23170.00)**

**NOTE: This price structure is only for NEW industrial wastewater permits. To renew a permit please refer to the Cost & Fees in the Appendix A of your existing permit.**

**For any other wastewater questions, please visit the Town of Billerica official website for sewer rules and regulations.**
